

SENTINELLOG

Log File Analyzer — Project Report

Table of Contents / Index

Section heading	Subsection	Figure / Diagram
Cover Page		1
1. Introduction		2
1.1 Problem Statement		2
1.2 Project Objectives		2
2. System Overview		3
2.1 System Architecture		3
Figure 1 — System Architecture Diagram		3
2.2 Technology Stack		4
3. Processing Pipeline		5
Figure 2 — Six-Stage Processing Pipeline		5
3.1 Stage 1 — Collect		5
3.2 Stage 2 — Parse		5
3.3 Stage 3 — Analyze		6
3.4 Stage 4 — Security Forensics		6
Figure 3 — Threat Detection Logic Diagram		6
3.5 Stage 5 — Persist		7
3.6 Stage 6 — Report		7
4. Security Detection Module		8
4.1 SQL Injection Detection		8
4.2 Path Traversal Detection		8

4.3 Brute Force Detection	8
4.4 Scanner User-Agent Detection	9
4.5 Rate Limit Burst Detection	9
4.6 XSS Attempt Detection	9
5. Live Analysis Results	10
5.1 Summary Statistics	10
5.2 Live Data Charts	10
Figure 4 — Live Data Charts (IP / Status / Hourly)	10
Figure 5 — matplotlib IP Activity Chart	11
5.3 Detected Threats	11
5.4 Raw Log Entries That Triggered Alerts	11
6. Output Formats in Detail	12
6.1 HTML Interactive Dashboard	12
6.2 PNG Multi-Panel Report	12
6.3 CSV and JSON	12
7. Command-Line Reference	13
7.1 analyze — core command	13
7.2 history — view past runs	14
7.3 export — re-export a saved run	14
7.4 GUI mode — no typing required	14
8. Real-World Applications	15
8.1 Application Index	15
8.2 SentinelLog vs Commercial SIEM Tools	15
9. Future Enhancements	16
10. Conclusion	16
